

Slip Ring Capsules (Compact)

AC7094

Fiber brush slip ring capsule

Description

A slip ring capsule can be used in any electromechanical system that requires unrestrained, intermittent or continuous rotation while transferring power and / or data. A slip ring is also called a rotary electrical joint, collector, commutator or swivel. A slip ring can improve system performance by simplifying operations and eliminating damage prone wires.

The AC7094 provides a compact 2.1 inch outside diameter. The AC7094 provides 5 amp circuits in 30, 36, 42 and 48 ring configurations. Similar in design to our very popular AC4598 and AC6200 series, this design features long life, fiber brush contact technology for ultimate performance in many challenging applications.
